

This is an announcement for our customers in Bald Eagle Village, Greenbrook and Parkway systems. It is that time of year again and our lead and copper samples must be obtained and turned in no later than June 15th 2018. We are asking for the cooperation of our customers in regards to obtaining these samples. On Monday June 11th and Tuesday June 12th we will be delivering bottles with instructions to customers throughout the developments for the required sampling. Please follow the directions that are included in the package. The sample must be taken first thing in the morning and left outside the front door where the MUA can pick it up. Again please follow the instructions and leave the sample for pick up on Wednesday June 13th or Thursday June 14th. No Samples can be picked up after Thursday June 14th. If you do not wish to participate you must fill out the required form and leave it for pick up as well, this is required by the State. The State requires that these samples be taken to ensure optimum water quality. If the MUA does not provide the correct number of samples then a violation will occur, we implore your assistance in obtaining these samples for pick up. If you have any question please do not hesitate to contact us at 973-506-7330. Thank you for your cooperation in this matter.
